

## DIONIS ESCORSA "FROM THE WINDOW\_4"

### WHAT IS CONFINEMENT FOR YOU?

Confinement is an immune response of the social body sponsored by the central nervous system that governs us. It's a retracting movement of cells within cells in the face of replicating invasion. It should be noted that it is rather an action to safeguard the outside: the one that is finally disinfected is the common blood, that is, the public space, the place of exchange and transit, the global body that conforms us, temporarily depriving it of cells that can expand a necrosis.

### WHAT COLOR DO YOU ASSOCIATE THE FUTURE WITH?

White, which contains all the colours.

### WHAT IMAGE DOES CONFINEMENT SUGGEST TO YOU?

"Saturn 0", 2020
